

# Pat McCormick

## Junior Software Developer

NSCC student in IT Programming learning various coding languages and design solutions. Seeking a Junior role for May 2023. Very teachable, work effectively in a fast-paced, deadline-driven setting and handles pressure well. Appreciates a good team and looks for a strong mentor in all environments.

### Accomplishments

Launched a profitable side business repairing retro Video Game consoles, handhelds, cartridges, and motherboards.

Made a personal goal to become a Red Seal Welder. Achieved that goal in 2017 but decided to pursue the industry I enjoy the most, IT.

### Skills

Junior level coding experience in languages such as: Java, C#, C++, C, Python, PHP, Kotlin, and JavaScript.

Junior level experience with Linux, HTML5, CSS, MySQL, unit testing, Android development and web app deployment. Basic experience in GUI development in Java, C# and Python. Experience with React, Spring, ASP .NET, Node.js and Laravel.

Understanding of Project Management practices and each members responsibilities. Understanding of Agile(Scrum) and similar methodologies.

### Education

**09-2021 - Current**      **IT Programming Diploma**  
*Nova Scotia Community College - Halifax, NS*

### Work Experience

**10-2021 - Current**      **In-Store Repair Technician - Geek Squad**  
*BestBuy, Halifax, NS*

- Personal goal of solving client issues in under 20 minutes while still providing above and beyond service.
- Actively listened to customers' requests, confirming full understanding before addressing concerns.
- Participated in continuous improvement by generating suggestions, engaging in problem-solving activities to support teamwork.

### Contact

**Address**  
Halifax, NS.

**Phone**  
902-565-1756

**E-mail**  
patmcc@gmail.com

**LinkedIn**  
linkedin.com/in/pmccormi

### Hobbies

**Golf** – Favorite way to get out and enjoy the weather.

**Electronics Repair** – Keeps me learning. Provides the satisfaction of reviving dead hardware.

### Goals

Create a browser-based adventure game reminiscent of a childhood favorite of mine.

Develop a thorough understanding of Mobile application development.

Become proficient in multiple software development subjects.

Reach a senior-level position within four years.
